Weight of Jib:	15,8 kg / 34,8 lbs
Max counterweight:	48 kg / 105lbs (4 x 12kg)
Tilt angle:	53 degree's

GF-Baby Jib Arm

The GF-Baby Jib is a stable, compact jib with an arm length of 45cm / 1' 5" (pivot point to Euro-adapter) for camera packages weighing up to 30kg / 66lbs. It provides smooth, vibration free movements in tight, confined spaces with a net weight of less than 16kg / 35lbs.

The counterweight end of the GF-Baby Jib Arm is telescopic out from 31cm / 1' up to max. 63cm / 2' and locked off at various lengths.

It can be very comfortably hand cranked to the required length, ensuring perfect balance at any angle.

Crankable weight end

The GF-Baby Jib's tilt "drag" can be adjusted to suit the individual operators preference.

Most of the Jib-Arm components are surface hardened, high grade aluminum, ensuring added protection and durability. (Hart-Coat®)

The complete Jib-Arm fits neatly into one custom designed flight case.

Euro-adapter or tube fitting

Low rig mode / Off-set bowls

High rig mode / Mitchell
